

Where it's *impossible* difficult to reach

HasselHolm's ATV (All Terrain Vehicle) has really earned its name. We've never found terrain where this machine can't get in and do its job. That's because we developed our ATV design using decades of experience from stump grinding. This machine gets in easily and has low ground pressure so the surrounding landscaping isn't harmed. The ATV has proven particularly valuable for areas such as cemeteries and urban areas.

Maintenance Grinding	👍	👍	👍
Deep Grinding	👍	👍	👍
Specialty Grinding	👍	👍	👍
Shrub and Hedge Grinding	👍	👍	👍

Planting Grinding	👍	👍	👍
Uprooted Tree Grinding		👍	👍

The motor has been tested and approved according to exhaust regulations in accordance with the European Euro 2; EU DGX 1 STAGE 2 and the American US EPA TKRE-1 regulations. Additionally, to fulfill the new noise pollution regulations in the US, the top RPM of this machine has been reduced drastically, which lowers sound and vibration levels.

HasselHolm's Specialty Machine for Tight Spaces

ATV S-14

Machine/environmental data

Grindwheel speed	3200 rpm
Max hydraulic pressure	280 Bar
Max grind depth	80 cm
Power DIN hp (kW)	35 (26)
Drivmedel	Diesel
Transmission	Hydrostat
Width	120 cm
Total weight	1300 kg

Save money and the environment

In addition to saving the costs for excavators, dumpsters, transportation and landfill, stump grinding is beneficial to the environment. Our method allows the stump to simply return to nature much more quickly as compost.
